ASHISH D. NAGMOTI

AI ENGINEER & RESEARCHER | LLM INFERENCE | GPU INFRASTRUCTURE

+91 9579764477 | ashishnagmoti2310@gmail.com | Nashik, Maharashtra, India
ashish-nagmoti.me | linkedin.com/in/ashish-nagmoti | github.com/ashish-nagmoti

PROFESSIONAL SUMMARY

AI Engineer and Researcher at ESDS Software Solution Ltd., focused on building and evaluating enterprise AI systems across LLM inference, GPU infrastructure, model serving, RAG, and AI platforms. Hands-on experience with vLLM, Kubernetes, KServe, Hugging Face runtimes, and cloud-native deployment. Interested in sovereign AI, secure agentic systems, and turning emerging AI capabilities into practical products.

TECHNICAL SKILLS

AI & LLM: LLM inference, model serving, vLLM, Hugging Face, RAG, embeddings, vector databases, agentic AI, model evaluation

Infrastructure: GPU infrastructure, NVIDIA GPUs, CUDA, Kubernetes, KServe, Kubeflow, Docker, Linux

Development: Python, FastAPI, Django, REST APIs, PostgreSQL, Git

Platforms & Security: MLflow, Aim, OPA/Rego, Keycloak, AI governance, observability, API security

PROFESSIONAL EXPERIENCE

AI Engineer and Researcher | Present
ESDS Software Solution Ltd. | Nashik, India

- Work across enterprise AI platform engineering, LLM inference, model serving, and GPU infrastructure.
- Contribute to an AIOps and AI platform built around Kubeflow, vLLM, Hugging Face runtimes, and KServe, covering notebooks, model deployment, API access, routing, and lifecycle workflows.
- Evaluate model deployment and inference configurations for GPU-backed workloads, including concurrency, context-window, performance, and infrastructure trade-offs.
- Research sovereign AI, RAG architectures, agentic workflows, AI security, governance, and observability for enterprise and regulated-industry use cases.
- Support technical research, POCs, product demonstrations, and architecture discussions for AI infrastructure and platform capabilities.

Backend Intern | Mar 2025 – Aug 2025
PrimeAcademy | Remote

- Worked on backend development using Django and AWS deployment workflows.

Technical Intern | Sep 2024 – Nov 2024
Lead Cured | Remote

- Built and tested serverless APIs using AWS Lambda, EC2, S3, and IAM.

SELECTED PROJECTS

SovereignRAG – Decentralized Enterprise AI
Designed a privacy-first, decentralized RAG concept in which departmental data remains within its own node; only policy-approved, signed claims are shared across departments. Focus areas include policy enforcement, cryptographic verification, and controlled disclosure.
Tech: Python, FastAPI, PostgreSQL, Qdrant, Ed25519, OPA/Rego, vLLM, React

KAVACH – LLM Security Platform
Co-led the development and product direction of an LLM security platform focused on protecting enterprise LLMs and AI agents against emerging threats and enabling safer AI adoption. Team secured 1st Prize at the ESDS Sharp Tank competition; contributed as CEO & CTO.
Tech: LLM security, AI agents, application security, product strategy

ESDS AIOps / Enterprise AI Platform
Contributed to platform research and POC work spanning GPU-backed notebooks, model serving, API key management, smart routing, model lifecycle workflows, agent operations, governance, and observability.
Tech: Kubeflow, vLLM, KServe, Hugging Face, Kubernetes, MLflow, Aim

EDUCATION

B.Tech, Artificial Intelligence & Data Science | K.K. Wagh Institute of Engineering Education & Research | 2022–2026 | CGPA: 9.1

RECOGNITION & LEADERSHIP

- 1st Prize – ESDS Sharp Tank, for KAVACH – LLM Security Platform (CEO & CTO, Team Patronus).
- Certificate of Excellence – Transformation & Change Drive, ESDS Software Solution Ltd.
- 1st position – Arambh training assessment, ESDS.
- Open-source contributor; participated in Social Winter of Code.
- 1st Place – Codethon, Arambh; 3rd Place – Code-O-Fiesta 2.0 (CSI).
- Student Coordinator, Innovation Vertical – Young Indians (YI).
- Vice President, Phoenix Club, K.K. Wagh Institute of Engineering Education & Research.
- Web & IT Head, INNOVERA National-Level Hackathon.

CERTIFICATIONS

AWS Academy Cloud Foundations • CS50x: Introduction to Computer Science – Harvard University • Google Cloud Computing Foundations and related Google Cloud skills badges • Python – Spoken Tutorial | NPTEL: Design Thinking – A Primer
